

Siddha Varma Energy Detoxification & Purification

World's only energy based complete body detoxification process.
for online and direct mode

This module will teach you the processes for complete detox of physical and energetic body. Also some basic healing post detoxification tools to fill the energy vacuum for negative energy clearance with healing energy.

What is the therapy about?

The Siddha system is one of the oldest system practised in South India, especially in Tamil Nadu. Nowadays traditional systems are highly encouraged by the public for treating diseases. But the major claim against it is that minerals and metals of toxic nature are used by traditional medicines.

Siddhar's, the inventors of Siddha medicine, not only provide the medicinal preparation for treating diseases but also mentioned the detoxification methodologies for purifying the ingredients. that includes metals, minerals and even plants.

Purification and Preparation procedure done as per the literature evidence is the only opportunity to break the claim that higher-order medicines are toxic nature and thus the acceptance of Siddha system of medicine around the world is possible.

Using this knowledge of detoxification and purification process, Sri Pranaji has developed an energybased system to do proper detoxification and purification of human body using energy and energyinfused water.

This process consists of 3 parts:

- 1.) Physical detox
- 2.) Energetic detox
- 3.) Purification (healing process)

1. Physical detox process

A program that can remove all toxins in the body. This energy thru a media. This is a powerful process where one may experience this:

For some people may create nausea of vomiting feeling. If you want to vomit, just vomit, don't hold it back.

- This may be will not happen in healthy people
- If a healthy person has no reaction, use cool plain water (not hot), drink it on the person to check the mercury content in the body, generally if there is mercury on the body the skin will feel itchy on the part that is rinsed with energised water.

This program is very helpful for **first aid in emergencies** such as food poisoning, suicide by drinking poison, poisonous fumes (all types of poison in food, drink, and air) etc.

2. Energetic detox

This is a powerful process that clears all negative energies which from the physical toxin that as energetic imprint which even after physical detox been done but continue in aura, and energy level for very long time and again it corrupt the bio system slowly. This single process will wipe out all toxic negative energy from entire body internal and external.

The shift in life can be noticed after this process.

3. Purification process

This is where all physical and energetic toxin detox removals will be filled up with good high vibrational energy to patch back and revitalise the system that become dull. Always remember the toxin in the body what we call "slow poison" it has been there in body for very long time and slowly damaged the functions of the organs or other systems systematically over a long period of time, the recovery and rejuvenation of course will take longer time also.

This process has 2 parts:

- 1) Body purification
- 2) Psychological purification

This is the complete process.

This therapy was designed to be very simple. This process with high effectiveness level can be done online, or hands on, or in a combination of hands on and online (this is the best of all options).

5 hours Online Training with Master Sri Pranaji, Malaysia:

Sunday 13th december 2020 from 10am to 3pm.

English with German and Italian translation.

For further informations and enrolments please contact Heidi at siddhaseminars@gmail.com Thank you.

Seminar fee: 250 Euro via paypal to Sri Pranaji directly after the training.
